Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,5,6,11,12,15,16,21,22,26,31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Jamal et al (US 5,533,067).

Claims 1,5.

Jamal et al discloses a method (see Fig.4), comprising:

determining from a received signal at least one variable representing statistical characteristics of a channel; see correlator (23) and Sync (24),

determining a prefilter (26) using at least one variable representing the statistical characteristics of the channel; see the output of the Sync (24) is provided to the control input of the prefilter and,

adapting sample rate of a prefilter output of the prefilter for an adaptive_channel estimator (31); see the sample rate of the prefiltered signal is adapted by the sync block (24). See col. 9, lines 30-37 in particular.

Claim 2.

Jamal et al discloses correlation between channel measurements, at the correlation 23, which is one of the recited statistical variables.

Claim 6.

Jamal et al does not teach the length of the channel estimator (31) is variable, implying

Art Unit: 2611

that it is configured constant.

Claims 11,15,21,31,32.

Jamal et al discloses a prefiltering arrangement (see Fig.4) comprising:

a first determination unit (23,24) configured to determine, from a received signal, at least one variable representing statistical characteristics of a channel; see correlator (23),

a second determination unit (38) configured to determine a number of prefilter taps of a prefilter using at least one variable representing the statistical characteristics of the channel; see the output of the Sync (24) is provided to the control input of the prefilter and

an adaptation unit (24) configured to adapt sample rate of the prefilter output of the prefilter for an adaptive channel estimator (31). See the sample rate of the prefiltered signal is adapted by the sync block (24). See col. 9, lines 30-37 in particular.

Claims 12 and 22.

Jamal et al discloses correlation between channel measurements, at the correlation 23, which is one of the recited statistical variables.

Claims 16 and 26.

Jamal et al does not teach the length of the channel estimator (31) is variable, implying that it is configured constant.

Allowable Subject Matter

Art Unit: 2611

3. Claims 3,4,7-10,13,14,17-20,23-25,27-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
